EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gregory R. Muir on 02/14/06. The application has been amended as follows:

In the claims:

Claim 1. (currently amended) A spatial light modulator comprising:

an array of micromirrors, each micromirror comprising a mirror plate having four predominant sides and being held on a substrate by a plurality of posts, wherein the four predominant sides define two diagonals, and wherein a line between any two of the plurality of posts is not coincident with either of the two diagonals; wherein the mirror plate is attached to a hinge that is supported by a post of the plurality of posts on the substrate; and wherein the mirror plate and hinge are separated by a gap in a direction perpendicular to the mirror plate when the mirror plate is parallel to the substrate, wherein the substrate has four predominant sides that form a rectangular shape; and wherein each side of the mirror plate is at an angle of from 5° degrees to 25° degrees to the two sides of the rectangular substrate.

Claim 5. (cancelled).

Art Unit: 2873

Claims 63-64. (cancelled).

Claims 66-74. (cancelled).

REASONS FOR ALLOWANCE

2. Claims 1-22 are allowed. The following is a statement of the examiner's reasons for allowance. The present application relates generally to micromirror array devices. Regarding claim 1, the prior art fails to disclose that wherein the substrate has four predominant sides that form a rectangular shape; and wherein each side of the mirror plate is at an angle of from 5° degrees to 25° degrees to the two sides of the rectangular substrate. The claimed invention is therefore considered to be in condition for allowance as being novel and non-obvious over prior art.

3. The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 USC 102 or 103 would be improper. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Other Information/Remarks

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Huibers (US Patent Publication 2002/0122239), Mushika (US Patent Publication 2005/0152019), and KO et al (US Patent Publication 2002/0001122) discloses similar spatial light modulators.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Dinh whose telephone number is 571-272-2327. The examiner can normally be reached on M-F (9:30 AM - 6:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ricky L. Mack can be reached on 571-272-2333. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
